

THE LOW VIBRATION HAND TOOL SOLUTION

40,000 RPM POWER TOOL KIT THE COMPLETE COMBO CASE TO GET YOU STARTED

Ergonomically Safer • Maintenance Free • Reliable

230DM
40,000 RPM, 0.88 HP
37.3 oz (1.06 kg)

Time to reach Exposure Action Value 2.5 m/s ² A(8)	345 hours, 40 minutes
Time to reach Exposure Limit Value 5 m/s ² A(8)	1382 hours, 37 minutes
Vibration magnitude m/s ² r.m.s	0.38

Almost silent, this light tool shows the power and superiority of the governed turbine. The 230DM incorporates heavy duty bearings and has collet capacities of 1/4" or 6mm. For use in heavy-duty applications where hard use is expected for graphite finishing or Kevlar cutting, die polishing, removing welds or foundry work.

- ▶ Get direct drive reliability with no maintenance.
- ▶ Reduced fatigue, hand arm stress and carpal tunnel injury risk.
- ▶ Just connect 90 psi, 6.2 Bar dry air.
- ▶ No lubrication required.

Double cut geometry for easy operator control and optimal surface finish!

BEST CARBIDE

Nonferrous Bur Kit

Best Carbide assures that carbide grade characteristics are engineered to perform at high speed. Efficient chip forming and evacuation is critical for optimal cutting performance.

- ▶ Over 40 years of Solid Carbide Cutting Tool Manufacturing Expertise.
- ▶ Special Single Flute Geometry for Improved Cutting Performance and Aggressive Stock Removal in Aluminum and Nonferrous Materials.
- ▶ Excellent Shank and Flute Concentricity.

Part Numbers	
230DM 1/4" 50K Nonferrous Bur Kit	77114
230DM 6mm 50K Nonferrous Bur Kit	77115

THE 230DM KIT INCLUDES

Air Turbine Tool®, collet wrenches, 5' air supply assembly with side valve, high flow filter regulator, 1/4" NPT, and air supply fitting all tools below.

1/4" Nonferrous Bur Kit: SA-1NF, SA-3NF, SC-1NF, SC-3NF, SD-3NF, SD-5NF, SF-3NF, SG-3NF.

Metric sizes also available.

EVERYTHING YOU NEED STARTING AT \$1,175
