## 625LDIN40 (100mm) - Spindle Series

Integration of the popular **DIN40** toolholder into the 625 spindle housing delivers constant high speed with ultra low vibration and improves accuracy and rigidity. The powerful **625LDIN40 (100mm)** with the reach for deep pockets, robotic face or edge milling, or furnishing operations up to 0.50 hp / 0.37 kW at 30,000, 40,000 or 50,000 rpm. At these high speeds, tool coatings achieve the required temperatures to extend endmill life saving money as well as accelerating production. Air Turbine Spindles® patented constant governed high speed operation under load cuts faster and cleaner - speeding up cycle times and achieving major savings. Faster cutting with small end mills and drills, finishing or polishing with super accuracy. High speed cutting improves finish quality and accuracy with a fast light pass of your tool. **No Duty Cycle.**
